# DAILY PUZZLES TRADE BALANCE IS AGAINST U.S.

Country Now Importing More Goods Than It Is Selling.

Selling.

Washington, D. C., September 1.—
The balance of trade, which has generally shown in the statistics of the last thirty years largely in favor of this country, has turned over. It now stands \$1,000,000 on the other side of the ledger for the first eight months of this calendar year. In the month of August swung the pendulun and brought to the United States \$563,425 mere in trade than it took out.

From that condition students of economics may draw conclusions as varied as they may be many. One is that there has been no readjustment of prices in the United States since the panic of 1907-1908. Another is that the balance of trade has been against us for a long time without showing in the statistics of merchandise because Americans spend \$150,000,000 a year in Europe and more millions are pa d for ocean steamship freight rates to the German and British banks.

However, it is generally expected that the condition of national banks at the close of business on September 1, now being complied, will verify the latter conclusion in a measure, and it is predicted that the gold imports for August, which amounted to \$9,668,182, are but the forerunner of the flow of gold due to come from Europe in September and October in settlements for shipments of grain and cotton.

But in spite of the inflow of gold for August the excess of exports for the first eight months of the calendar year is more than \$10,000,000. That is

for the crop moternation of the moncy centres. The formation of emergency currency associations, at the suggestion of Secretary MacVesgh, is expected to relieve any situation that
might come about from the interior
banks hoarding their money. Some of
the hearty supporters of the law believe it may offset the position the
treasury is in because of the foreign
trade situation.

It is pointed out that with the balance of trade against the United States
and the working balance in the treasure at its present condition, the emer-
